Seeking Co-Founder/Partnership Role at AI-First Startup (Seed-Series A) • Equity-Motivated

Professional Summary

AI product strategist and technical leader who ships production systems that matter. Built **award-winning ELLE AI Decision Engine** at Uber, serve as **Part-time CTO** at FasterOutcomes (AI legal tech startup), and run AI consulting businesses (VisionzLab, BayRockLabs). Excel at the intersection of **vision** (what should we build?) and **execution** (ship MVPs in 12 weeks using AI-assisted development achieving 3-5x productivity gains).

Entrepreneurial Track Record: Launched **8 personal SaaS products** from concept to production. **13K+ LinkedIn followers** as AI/ML thought leader. Published on Medium with articles reaching 50K+ readers.

Seeking **co-founder/partnership role** at AI-first startup (Seed-Series A) where I can shape product strategy AND architect/build the technical foundation. **Equity-motivated** for right opportunity.

Tools, Frameworks, Libraries, Languages, Databases

AI/ML & LLM Frameworks

LangChain • LangGraph • FastMCP • MCP Development • CrewAI • Ollama • Prompt Engineering • Agentic Workflows • AI Agents • RAG Systems

Agentic Coding & AI Tools

Claude Code • Cursor • GitHub Copilot • Codex • Aider • AI-Assisted Development • MCP Server Development • 3-5x Productivity Gains

LLM Platforms

OpenAI (GPT-4, GPT-3.5) • Anthropic Claude (Sonnet, Opus) • Google Gemini • Cohere • Meta LLMs • Hugging Face Models • Open Source LLMs • Model Fine-Tuning • Prompt Engineering

Vector Databases & Embeddings

OpenSearch • Pinecone • Qdrant • Chroma • Weaviate • Embedding Models • Semantic Search • RAG • Vector Similarity Search

Backend Frameworks

Python (FastAPI, LangFx, Pydantic, Uvicorn, async/await) • Go (YARPC, gRPC, microservices) • Node.js (Express, NestJS) • Java (Spring Boot) • C# (.NET Core)

Frontend Frameworks

React 18 • TypeScript 5.7 • NextJS • Fusion.js • TanStack React Query • Redux • Angular • VueJs • BaseUI • shadcn/ui • Tailwind CSS • Material Design • Styletron

Cloud Platforms

Google Cloud (GCP Cloud Run, Firestore, Firebase) • AWS (EC2, Lambda, S3, RDS, DynamoDB) • Azure (VMs, Functions, CosmosDB) • Serverless Architecture

Container & Orchestration

Docker • Kubernetes (K8S) • Helm • Istio • Rancher • Google Kubernetes Engine • Container Orchestration • Service Mesh

API & Integration

GraphQL • gRPC • REST • Protocol Buffers • Apache Thrift • Swagger/OpenAPI • OAuth2/OIDC • JWT • Webhooks • API Design • Microservices Architecture

Data & Messaging

Apache Kafka • Cadence • Temporal • Apache Spark (PySpark) • Presto • Hive • HDFS • Airflow • Event-Driven Architecture • Stream Processing

Databases

Cassandra • MySQL • PostgreSQL • MongoDB • Redis • DynamoDB • Elasticsearch • Firestore • CouchDB • SQL Server • Database Design • Data Modeling

DevOps & CI/CD

Bazel • GitHub Actions • Jenkins • Bamboo • Circle CI • Terraform • Ansible • Chef • Puppet • Infrastructure as Code • GitOps • Continuous Deployment

Monitoring & Observability

M3 • Prometheus • Grafana • Datadog • Splunk • Zap Logging • Jaeger (distributed tracing) • Kibana • Application Performance Monitoring • Distributed Tracing

Skills and Achievements

Entrepreneurship & Product Vision:

- 0→1 Product Building: Launched 8 personal SaaS products from concept to production (2015-2024)
- Product Strategy: Customer discovery, product-market fit, go-to-market strategy, competitive positioning
- AI Product Design: RAG systems, AI agents, agentic workflows for legal tech, fintech, healthcare, ecommerce
- MVP Velocity: Ship production MVPs in 12 weeks using Claude Code, Cursor, and agentic coding workflows (3-5x productivity gains)
- Business Development: Substantial consulting revenue, 15+ clients across diverse industries
- Thought Leadership: 13K+ LinkedIn followers, 50K+ Medium article views, AI/ML community influence
- Equity Negotiation: Secured equity stake at FasterOutcomes AI legal tech startup

Technical Execution:

- Production LLM Systems: Multi-agent architectures, RAG pipelines, prompt engineering, semantic search
- Agentic Coding Expert: Claude Code, Cursor, GitHub Copilot, MCP development - accelerating team velocity 3-5x with AI-powered workflows
- Full-Stack Development: React/TypeScript frontend, Python/FastAPI backend, Go microservices, cloud-native
- AI/ML Engineering: LangChain/LangGraph, vector databases, model selection, fine-tuning, ML pipelines
- Distributed Systems: Microservices, API platforms, event-driven architecture, workflow orchestration
- Data Engineering: Apache Spark, Kafka streaming, ETL/ELT pipelines, real-time analytics
- Cloud Architecture: GCP, AWS, Azure - serverless, containerized, managed services
- DevOps Excellence: CI/CD pipelines, infrastructure as code, container orchestration, monitoring/observability

Strategic Impact:

- Innovation Leadership: Won multiple Uber innovation awards for ELLE AI Decision Engine (70% efficiency gain)
- Customer Success: 80% client retention rate, 90% would recommend, 4.5/5 average satisfaction
- Team Building: Built and scaled engineering teams, hired/mentored 50+ engineers
- Fundraising Support: Technical due diligence, investor presentations, pitch deck development
- Market Validation: Identified product-market fit patterns across legal, finance, healthcare, retail industries
- AI Productivity: Proven 3-5x productivity gains using AI companion workflows (Aider, CoPilot, Claude Code)

Personal AI Products Portfolio (Entrepreneurship Evidence)

8 SaaS Products Built from 0→1 (2015-2024):

1. <https://fasteroutcomes.com> (2024) - AI Legal Tech Platform

- **Role:** Part-time CTO
- **Product:** AI-powered client intake, document discovery, case management for law firms
- **Tech:** LangChain, RAG, Pinecone, React, NextJS, Firebase, GCP

- **Impact:** 10+ law firms in beta (50+ users), 80% client intake automation, 60% time savings on discovery
- **Learning:** Validated RAG architecture for legal domain, identified product-market fit in legal AI

2. <https://counta.ai> (2024) - AI Accounting Automation

- **Product:** Multi-agent accounting workflows for small businesses
- **Tech:** LangChain, LangGraph, CrewAI, React, Firebase
- **Learning:** Validated multi-agent architectures for complex business workflows

3. <https://frwr.ai> (2023) - AI Product Platform

- **Product:** AI-powered product management and strategic planning tools
- **Tech:** React, NextJS, OpenAI API, Firebase
- **Learning:** Early exploration of AI assistants for product managers

4. <https://visionzlab.com> (2023, updated) - AI Development Studio

- **Product:** Consulting brand and AI development showcase
- **Tech:** NextJS, React, Tailwind CSS, Vercel
- **Impact:** 15+ consulting clients, substantial revenue
- **Learning:** Validated AI consulting market demand, built repeatable delivery patterns

5. <https://maktub.app> (2018) - SaaS Application

- **Product:** Collaborative workspace and project management tool
- **Tech:** React, Node.js, MongoDB, AWS
- **Learning:** Full-stack product development, SaaS business model validation

6. <https://lastcall.cc> (2017) - Hospitality Product

- **Product:** Restaurant/bar management and customer engagement platform
- **Tech:** Angular, Node.js, PostgreSQL, AWS
- **Learning:** Mobile-first design, real-time data sync

7. <https://loggir.com> (2016) - Logging Platform

- **Product:** Developer logging and debugging platform
- **Tech:** React, Node.js, Elasticsearch, AWS
- **Learning:** Developer tools market, search and analytics at scale

8. <https://exclusivelistings.club> (2015) - Real Estate Marketplace + AI Chatbot

- **Product:** Real estate marketplace with AI-powered property search
- **Tech:** AngularJS, ASP.NET MVC, SQL Server, Azure

- **Learning:** Marketplace dynamics, early AI chatbot implementation

Key Insights from Product Building:

- **0→1 Pattern:** Validated repeatable process for shipping MVPs in 12 weeks
- **AI Advantage:** AI-assisted development (Aider, CoPilot) delivers 3-5x productivity gains
- **Customer Focus:** Customers pay for results and speed, not technology sophistication
- **Product-Market Fit:** Automation beats intelligence, speed beats perfection
- **Tech Stack:** React/NextJS + Python/FastAPI + Firebase/GCP = optimal velocity stack

Entrepreneurial Experience

FasterOutcomes AI Legal Tech | Part-time CTO (1% Equity)

Mar 2024 - Present | Remote | Seed Stage

Vision & Product Strategy:

Transforming legal industry through AI-powered client intake, discovery, and case management. Built product from **vision to MVP in 12 weeks**.

Strategic Achievements:

- **Product Roadmap:** Defined go-to-market strategy, feature prioritization, technical positioning for Series A
- **0→1 Build:** Shipped MVP with small team (3 engineers + 2 product) in 12 weeks
- **Fundraising:** Supporting Series A fundraising with technical due diligence and investor presentations

Technical Execution:

- Architected **AI-first platform** (RAG, multi-agent systems, agentic workflows)
- Built **production RAG system** for legal document search (100K+ documents, Pinecone vector DB)
- Designed **full-stack product** (React, NextJS, Python, Firebase, GCP)
- Integrated **multiple LLM providers** (OpenAI, Anthropic Claude) with fallback strategies

Customer Success:

- **Early Traction:** 10+ law firms in beta (50+ users)
- **Product Feedback:** 4.5/5 average rating, 70% would recommend to peers
- **Use Cases:** Client intake (80% automation), document discovery (60% time savings), case analysis

Technologies: Python (LangChain, LangGraph), React, NextJS, Firebase, GCP, OpenAI, Anthropic Claude, Pinecone

VisionzLab / BayRockLabs | Founder & AI Solutions Lead

Jan 2021 - Present | Remote

Vision:

Building AI consulting practice helping companies ship production LLM products faster while learning what works (and what doesn't) in real-world AI applications.

Business Success:

- **Revenue:** Substantial consulting revenue through inbound and referrals
- **Clients:** 15+ companies across legal tech, fintech, healthcare, ecommerce, manufacturing
- **Thought Leadership:** 13K+ LinkedIn followers, Medium blog with 50K+ article views
- **Customer Success:** 80% client retention, 90% would recommend

Product Execution:

- Shipped **10+ production AI solutions** (RAG systems, AI agents, automation tools) across diverse industries
- Built **MVPs in 12 weeks** using AI companion workflows (3-5x productivity multiplier)
- Implemented **LangChain, LangGraph, RAG** architectures for legal research, financial analysis, healthcare diagnostics

Key Client Projects:

- **Legal Tech:** RAG system for legal document analysis, contract review, compliance checking
- **Fintech:** AI accounting automation (Counta AI), financial analysis, fraud detection
- **Healthcare:** Patient data analysis, clinical decision support, medical documentation automation
- **Ecommerce:** Product recommendations, inventory optimization, customer behavior prediction
- **Manufacturing:** Predictive maintenance, quality control automation

Strategic Insights:

- Learned **what customers actually pay for** in AI products (results > technology)
- Identified **product-market fit patterns** across industries (automation > intelligence, speed > perfection)
- Validated **AI companion workflows** as competitive advantage (3-5x productivity gains)

Technologies: Python (LangChain, LangGraph, FastAPI), React, NextJS, Firebase, GCP, OpenAI, Anthropic Claude, Pinecone, Qdrant

Industries: Legal Tech • Fintech • Healthcare AI • Ecommerce • Manufacturing • Hospitality

Uber I Solution Architect (Product Innovation)

Jan 2021 - Present | Remote

Product Vision:

Identified opportunity to automate Technical Privacy reviews using LLM technology (early 2023, before ChatGPT hype). Built business case, secured executive sponsorship, and delivered **award-winning ELLE AI Decision Engine**.

Business Impact:

- **ELLE:** Reduced manual review time by **70%**, processing **millions of decisions** (won multiple internal innovation awards)
- **ROI:** Saved **1000+ engineering hours/year** in manual privacy reviews
- **Adoption:** 500+ users across Privacy, Security, and Legal teams globally

Product Strategy:

- Conducted **customer discovery** with 50+ privacy engineers, security analysts, legal reviewers
- Defined **product roadmap** balancing quick wins (automated guidance) vs long-term vision (autonomous decision-making)
- Built **multi-agent architecture** (6+ automated workflows) starting with highest-value use case (Technical Privacy Review)

Technical Execution:

- Architected **production LLM system** (LangChain, LangGraph, RAG) from concept to production
- Led **9 full-stack projects** (React, TypeScript, Fusion.js) across privacy domain
- Shipped features **2-3x faster** than typical Uber projects using AI companion workflows

Technologies: Python (LangChain, LangGraph), Go (YARPC, gRPC), React, TypeScript, OpenAI, OpenSearch, Kafka, Cadence

Home Depot Canada I Lead Solution Architect (Product Leadership)

Dec 2017 - Dec 2019 | Toronto, Canada

Product Vision:

Led architecture for **Customer 360 Platform** - unified customer data platform enabling personalized marketing and customer insights.

Business Impact:

- **Revenue:** Enabled **\$50M+ in targeted marketing** revenue through personalized customer insights
- **Customer Experience:** Improved customer satisfaction by 25% through personalized recommendations

- **Team Leadership:** Led team of 10+ onshore and 50+ offshore developers

Technical Execution:

- Designed **microservices architecture** (25+ services) for real-time customer data processing
- Built **Kafka/Spark pipeline** processing **2M+ events/day**
- Implemented **Angular Universal Server-Side Rendering** for SEO and social sharing
- Architected **caching layer** leveraging Redis, reducing API response times by 60%

Technologies: Java Spring Boot, Kafka, Cassandra, Redis, React, Angular, AWS, Kubernetes

Thought Leadership & Community

LinkedIn: 13K+ followers • AI/ML thought leader

- Published 50+ posts on production LLM systems, AI product strategy, agentic coding, AI-assisted development
- Average engagement: 10K+ views per post, 200+ likes
- Topics: RAG systems, AI agents, production AI challenges, startup product strategy

Medium: [@FrankGoortani](#)

- Published articles on LangChain, RAG systems, AI agents, production AI systems, distributed architectures
- Total views: 50K+, growing 20%/month
- Focus: Practical AI implementation, real-world challenges, lessons learned

Speaking & Publications:

- Available for conference talks on AI product strategy, production LLM systems, and 0→1 builds
- Guest on AI podcasts discussing production AI challenges
- Corporate Instructor - The Judge Group (Cloud Migration course, 2017-2019)

Industry Contributions:

- Open source contributions to LangChain, LangGraph ecosystems
- Active in AI product communities (AI Engineer Summit, LangChain Discord)
- Mentored 50+ engineers across startups and Fortune 500 companies

Education and Professional Development

M.Sc. in Management

AmirKabir University of Technology (Tehran Polytechnic), Iran | 2003

B.Sc. in Computer Software Engineering

AmirKabir University of Technology (Tehran Polytechnic), Iran | 2001

Certifications:

- Certified Data Scientist, Johns Hopkins University, 2015
- PMP Certified (Project Management Professional), PMI, 2013
- TOGAF 9.1 Certified, The Open Group Architecture Framework, 2013
- ITIL Foundation, Mind Leaders, 2013
- MCPD - Web Application Development 2008, Microsoft, 2012
- MCITP - Database Developer 2008, Microsoft, 2012
- Agile Project Management Strategy and Analysis, 2013
- Data Warehousing Management, Mind Leaders, 2013
- OWASP Top 10, Security Compass, 2012

Why Partner with Me

- **Vision + Execution:** Shape product strategy AND architect/build the technical foundation
- **Proven Track Record:** Award-winning products at Uber, 8 personal SaaS products launched, consulting revenue
- **AI Expertise:** Deep production LLM knowledge (LangChain, RAG, AI Agents) from real-world implementations
- **Thought Leadership:** 13K+ LinkedIn followers, established voice in AI product community
- **AI Productivity Advantage:** Ship MVPs 3-5x faster using AI companion workflows
- **Customer-Focused:** 80% client retention, 90% would recommend, 4.5/5 satisfaction
- **Business Acumen:** Understand fundraising, revenue models, go-to-market strategies
- **Entrepreneurial DNA:** Launched 8 products, validated repeatable 0→1 build process

Target Opportunities

Preferred Roles:

- Co-Founder (Technical)
- Technical Partner
- AI Product Strategist
- VP Product (AI-focused)
- Part-time CTO/CAIO (startup)

Company Stage: Seed to Series A (AI-first companies)

Work Style:

- Remote-only, high autonomy, results-oriented culture
- Part-time to start (10-20 hrs/week) with transition to full-time for right opportunity

Industries: Legal Tech • Fintech • Healthcare AI • Enterprise SaaS • Developer Tools

Availability

- **Available for:** Co-founder conversations, technical partnership discussions, advisory roles
- **Start:** Can begin part-time (10-20 hrs/week) immediately, transition to full-time for right opportunity
- **Network:** 13K+ LinkedIn followers, AI community connections for early customer validation
