Seeking FDE Role at AI Platform Vendor (Anthropic, OpenAI, Databricks, Snowflake, Cohere)

Professional Summary

Forward Deployed Engineer profile: 25+ years shipping production systems, **deep LLM expertise**, proven ability to **embed with customers** and deliver solutions independently. Built production AI systems at **Uber** (award-winning ELLE), implemented AI solutions for customers across industries (**legal, fintech, healthcare, retail**) via consulting engagements. Technical depth in **LangChain, RAG, AI Agents, full-stack development** (Python, Go, React) combined with ability to **translate customer needs** into working technical solutions. **4+ years teaching experience** training 100+ engineers on cloud, data warehousing, and web development.

Seeking **FDE role** at AI platform vendor (Anthropic, OpenAI, Databricks, Snowflake, Cohere) where I can help customers succeed with production AI implementations.

Tools, Frameworks, Libraries, Languages, Databases

AI/ML & LLM Frameworks

LangChain • LangGraph • FastMCP • MCP Development • CrewAI • Ollama • Prompt Engineering • Agentic Workflows • AI Agents • RAG • Multi-Agent Systems • Model Fine-Tuning

Agentic Coding & AI Tools

Claude Code • Cursor • GitHub Copilot • Codex • Aider • AI-Assisted Development • MCP Server Development • 3-5x Productivity Gains

LLM Platforms

OpenAI (GPT-4, GPT-3.5) • Anthropic Claude (Sonnet, Opus) • Google Gemini • Cohere • Meta LLMs • Hugging Face Models • Open Source LLMs • Model Selection • Model Evaluation

Vector Databases & Embeddings

OpenSearch • Pinecone • Qdrant • Chroma • Weaviate • Embedding Models • Semantic Search • Vector Similarity Search • Re-ranking

Backend Frameworks

Python (FastAPI, LangFx, Pydantic, Uvicorn, async/await) • Go (YARPC, gRPC, microservices) • Node.js (Express, NestJS) • Java (Spring Boot) • C# (.NET Core)

Frontend Frameworks

React 18 • TypeScript 5.7 • NextJS • Fusion.js • TanStack React Query • Redux • Angular • VueJs • BaseUI • shadcn/ui • Tailwind CSS • Material Design

Cloud Platforms

Google Cloud (GCP Cloud Run, Firestore, Firebase, GKE) • AWS (EC2, Lambda, S3, RDS, DynamoDB, ECS) • Azure (VMs, Functions, CosmosDB, AKS) • Serverless Architecture

Container & Orchestration

Docker • Kubernetes (K8S) • Helm • Istio • Rancher • Google Kubernetes Engine • Container Orchestration • Service Discovery

API & Integration

GraphQL • gRPC • REST • Protocol Buffers • Apache Thrift • Swagger/OpenAPI • OAuth2/OIDC • JWT • Webhooks • API Gateway

Data & Messaging

Apache Kafka • Cadence • Temporal • Apache Spark (PySpark) • Presto • Hive • HDFS • Airflow • Event-Driven Architecture • Stream Processing

Databases

Cassandra • MySQL • PostgreSQL • MongoDB • Redis • DynamoDB • ElasticSearch • Firestore • CouchDB • SQL Server

DevOps & CI/CD

Bazel • GitHub Actions • Jenkins • Bamboo • Circle CI • Terraform • Ansible • Chef • Infrastructure as Code • GitOps • Continuous Deployment

Monitoring & Observability

M3 • Prometheus • Grafana • Datadog • Splunk • Zap Logging • Tally Metrics • Jaeger (Distributed Tracing) • Kibana • Application Performance Monitoring

Security & Compliance

OAuth2/OIDC • RBAC • Encryption (TLS, mTLS, PKI) • HIPAA Compliance • SOC 2 • GDPR/CCPA • Security Best Practices

Skills and Achievements

Customer Success & Consulting:

- Customer Engagement: Delivered 15+ production AI implementations with 80% client retention and 4.5/5 satisfaction
- Requirements Gathering: Conducted 50+ customer discovery sessions across privacy, security, legal, and business teams
- Solution Design: Translated business problems into technical solutions achieving measurable ROI (60% time savings, \$200K+ annual savings)
- Technical Training: Trained 100+ engineers and customers on AI/ML systems, cloud migration, and technical best practices
- Cross-Functional Collaboration: Partnered with engineering, product, legal, and business teams across 8+ industries
- Customer Documentation: Created comprehensive technical documentation, user guides, and training materials for non-technical audiences
- Post-Deployment Support: Provided ongoing support via Slack, office hours, and troubleshooting sessions

AI/ML Implementation:

- Production LLM Systems: Built and deployed RAG systems, AI agents, and multi-agent architectures for real-world customer use cases
- Industry Expertise: Legal tech (document analysis, legal research), fintech (fraud detection, risk analysis), healthcare (diagnostic support, HIPAA compliance), retail (product recommendations, customer analytics)
- Integration Patterns: Integrated LLM systems with existing customer infrastructure (Shopify APIs, HIPAA-compliant architectures, enterprise data pipelines)
- Model Selection: Advised customers on OpenAI vs Anthropic vs Google Gemini vs Cohere based on use case requirements
- Prompt Engineering: Achieved 90%+ accuracy on customer use cases through prompt optimization and few-shot learning
- Vector Databases: Implemented semantic search with OpenSearch, Pinecone, Qdrant for document retrieval

Technical Execution:

- Full-Stack Development: React/TypeScript frontend, Python/FastAPI backend, Go microservices, cloud-native applications
- Rapid Prototyping: Built MVPs in 4-8 weeks from requirements to production for customer engagements
- Cloud Architecture: GCP, AWS, Azure deployments with serverless, containerized, and managed services
- Data Pipelines: Apache Spark, Kafka streaming, real-time analytics for customer data processing
- DevOps & Automation: CI/CD pipelines, infrastructure as code, container orchestration for customer deployments
- Security & Compliance: HIPAA-compliant architectures, GDPR/CCPA compliance, encryption at rest/transit

Communication & Leadership:

- Technical Presentations: Delivered presentations to C-level executives, VPs, and technical teams across customer organizations
- Whiteboarding: Solution design sessions with customers translating complex technical concepts into visual diagrams

- Customer Workshops: Led workshops on AI/ML best practices, prompt engineering, agentic coding with Claude Code, and production LLM systems
- Teaching Experience: 4+ years as corporate and college instructor (Cloud Migration, Data Warehousing, Web Development, BI)
- Thought Leadership: 13K+ LinkedIn followers, published technical articles reaching 50K+ readers
- Cross-Industry Versatility: Legal, fintech, healthcare, retail, manufacturing, hospitality, insurance, banking

Professional Experience

AI Consulting & Implementation | VisionzLab, Architect.solutions, BayRockLabs

Jan 2021 - Present | Remote

Customer-Facing Consulting:

Delivered **15+ production AI implementations** for customers across **legal tech, fintech, healthcare, ecommerce, manufacturing, hospitality** industries. Embedded with customer teams to understand requirements, design solutions, implement systems, and ensure successful adoption.

Customer Success Metrics:

- **80% client retention** (customers return for additional projects)
- **90% would recommend** to peers (measured via surveys)
- **Average project delivery:** 4-8 weeks from requirements to production
- **Customer satisfaction:** 4.5/5 average rating

Representative Engagements:

Legal Tech - Document Analysis System

Customer: Mid-sized law firm (50+ attorneys)

Challenge: Manual document review taking 100+ hours/week, needed AI automation

Solution Delivered:

- Built **RAG system** for legal document search (Pinecone vector DB, 100K+ documents indexed)
- Implemented **multi-agent system** for automated legal research, document drafting, case analysis
- Designed **full-stack web app** (React, NextJS, Python FastAPI, Firebase)
- Integrated **multiple LLM providers** (OpenAI GPT-4, Anthropic Claude) with fallback strategies
- Provided **customer training** on prompt engineering and AI best practices

Customer Impact:

- **60% reduction** in manual document review time
- **\$200K+ annual savings** in paralegal hours
- **3-month ROI** on implementation cost

Technologies: Python (LangChain, LangGraph), React, NextJS, Firebase, GCP, OpenAI, Anthropic Claude, Pinecone

Fintech - Fraud Detection & Risk Analysis

Customer: Fintech startup (Series A, payments platform)

Challenge: High false-positive rate in rule-based fraud detection, needed ML solution

Solution Delivered:

- Built **AI-powered fraud detection** using LangChain and RAG for transaction pattern analysis

- Implemented **real-time risk scoring** with sub-100ms latency
- Designed **alert system** with Kafka messaging and dashboard (React, TypeScript)
- Trained customer team on prompt engineering and model fine-tuning

Customer Impact:

- **40% reduction** in false positives (improved customer experience)
- **25% increase** in fraud detection accuracy
- **\$500K+ annual savings** in fraud losses

Technologies: Python (LangChain, FastAPI), Kafka, React, TypeScript, OpenAI, Qdrant (vector DB)

Healthcare - Patient Data Analysis

Customer: Healthcare AI startup (diagnostic support tools)

Challenge: Needed RAG system for medical literature search and diagnostic recommendations

Solution Delivered:

- Built **medical RAG system** indexing 50K+ medical journals, research papers, clinical guidelines
- Implemented **AI agents** for differential diagnosis suggestions based on patient symptoms
- Designed **HIPAA-compliant architecture** (encryption at rest/transit, audit logging)
- Provided **customer training** on prompt engineering for medical use cases

Customer Impact:

- **50% faster** medical literature search for physicians
- **90% accuracy** on differential diagnosis suggestions (validated by medical experts)
- **HIPAA compliance** certified by third-party auditors

Technologies: Python (LangChain, LangGraph), OpenSearch (vector DB), OpenAI, GCP (Cloud Run, Cloud Functions), HIPAA-compliant infrastructure

Ecommerce - Product Recommendation Engine

Customer: Mid-market ecommerce company (\$50M+ revenue)

Challenge: Generic product recommendations, needed personalized AI-driven recommendations

Solution Delivered:

- Built **AI recommendation engine** using RAG for product catalog search and customer preference analysis
- Implemented **real-time personalization** based on browsing history, purchase patterns
- Integrated with existing ecommerce platform (Shopify) via APIs

Customer Impact:

- **30% increase** in conversion rate
- **\$2M+ additional revenue** in first 6 months
- **20% increase** in average order value

Technologies: Python (LangChain), React, Shopify APIs, Pinecone, OpenAI

Uber | Solution Architect

Jan 2021 - Present | Remote

Customer-Facing Work:

Built **ELLE AI Decision Engine** serving 500+ internal customers (Privacy, Security, Legal teams globally).

Customer Engagement:

- Conducted **50+ customer discovery sessions** with privacy engineers, security analysts, legal reviewers
- Gathered requirements across **6+ use cases** (Technical Privacy Review, Security Guidance, Legal Review, etc.)
- Delivered **training sessions** to 100+ users on using ELLE for automated workflows
- Provided **ongoing support** via Slack, documentation, and office hours
- Created **comprehensive documentation** for non-technical users (legal, privacy, compliance teams)

Customer Success:

- **70% reduction** in manual review time (customer reported)
- **500+ users** across global teams (99% adoption within Privacy org)
- **4.5/5 satisfaction** rating (measured via internal surveys)
- **Won multiple innovation awards** for customer impact and automation efficiency

Technical Implementation:

- Built production LLM system (LangChain, LangGraph, RAG) processing millions of decisions
- Architected multi-agent system with 6+ automated workflows
- Implemented full-stack web app (React, TypeScript, Fusion.js) for user interface
- Integrated with 30+ Uber platform services (USSO, Charter, Cadence, M3, Zap)

Technologies: Python (LangChain, LangGraph), Go (YARPC, gRPC), React, TypeScript, OpenAI, OpenSearch, Kafka, Cadence

Home Depot Canada | Lead Solution Architect

Dec 2017 - Dec 2019 | Toronto, Canada

Customer-Facing Projects:

- **Customer 360 Platform:** Worked with marketing teams to understand customer data needs, designed unified customer data platform
- **Inventory Management:** Embedded with store operations teams to understand pain points, built real-time inventory sync system
- **Team Leadership:** Led team of 10+ onshore and 50+ offshore developers

Customer Impact:

- **\$50M+ in targeted marketing** revenue through personalized customer insights
- **20% improvement** in in-store product availability
- **25% increase** in customer satisfaction through personalized recommendations

Technologies: Java Spring Boot, Kafka, Cassandra, Redis, React, Angular, AWS, Kubernetes

Teaching & Training Experience (Customer-Facing Communication)

Corporate Instructor - The Judge Group (2017-2019)

- Taught "Migration to Cloud" course to enterprise organizations
- Covered cloud migration phases: Decision Making, Planning, Architecture, CI/CD, Operations, HA/DR
- Trained 50+ engineers on AWS, Azure, and GCP migration patterns

College Instructor - George Brown College (2014-2017)

- Developed comprehensive course for Web and Business Intelligence using SQL Server 2012
- Taught 40+ students per semester on data warehousing, BI, and web development

- Created hands-on labs and practical assignments for real-world skill development

International Instructor - Learning Tree (2014-2015)

- Provided online and in-class courses across North America (Washington DC, Toronto)
- Course: "Designing an Effective Data Warehouse"
- Trained 30+ students on data modeling, ETL, and BI best practices

College Instructor - Cestar College / Lampton College (2013-2016)

- Developed entry-level to advanced curricula: Ruby on Rails, JavaScript, Java, C#, iOS, Android
- Taught 50+ students full-stack web and mobile development
- Created project-based learning curriculum for hands-on experience

Impact: Trained 100+ students who went on to careers in software engineering, data science, and cloud architecture

Technical Interviews & Customer Success

Conducted 100+ technical interviews for top-tier companies:

- Robinhood, Netflix, Airbnb, Peloton, Gap, and other FAANG/tech companies
- Evaluated candidates on coding skills, system design, and cultural fit
- Provided feedback to hiring managers on candidate strengths and areas for improvement

Customer Success Skills:

- **Communication:** Technical presentations to C-level executives, whiteboarding sessions, workshops
- **Problem Solving:** Rapid requirements gathering, translating business problems into technical solutions
- **Project Management:** End-to-end ownership of customer implementations, stakeholder management
- **Post-Deployment Support:** Ongoing optimization, troubleshooting, and feature enhancements

Industry Expertise

Legal Tech: Document analysis, legal research, case management, DSAR automation, privacy compliance

Fintech: Fraud detection, risk analysis, payment processing, financial data analysis

Healthcare: Medical literature search, diagnostic support, patient data analysis, HIPAA compliance

Retail/Ecommerce: Product recommendations, customer analytics, inventory management, personalization

Manufacturing: Supply chain optimization, quality control, predictive maintenance

Hospitality: Customer experience optimization, booking systems, personalization

Insurance: Policy management, claims processing, risk assessment

Banking: Payment processing, fraud detection, customer analytics

Education and Professional Development

M.Sc. in Management

Amirkabir University of Technology (Tehran Polytechnic), Iran | 2003

B.Sc. in Computer Software Engineering

Amirkabir University of Technology (Tehran Polytechnic), Iran | 2001

Certifications:

- Certified Data Scientist, Johns Hopkins University, 2015
- PMP Certified (Project Management Professional), PMI, 2013
- TOGAF 9.1 Certified, The Open Group Architecture Framework, 2013
- ITIL Foundation, Mind Leaders, 2013
- MCPD - Web Application Development 2008, Microsoft, 2012

- MCITP - Database Developer 2008, Microsoft, 2012
- Agile Project Management Strategy and Analysis, 2013
- Data Warehousing Management, Mind Leaders, 2013
- OWASP Top 10, Security Compass, 2012

Thought Leadership & Community

LinkedIn: 13K+ followers • AI/ML thought leader

- Published 50+ posts on production LLM systems, customer success with AI, implementation best practices
- Average engagement: 10K+ views per post, 200+ likes

Medium: [@FrankGoortani](#)

- Published articles on LangChain, RAG systems, AI implementation, customer success patterns
- Total views: 50K+, growing 20%/month

Speaking & Publications:

- Available for conference talks on production AI implementation, customer success with AI, FDE best practices
- Guest on AI podcasts discussing customer-facing AI work and real-world challenges

Why I Excel as a Forward Deployed Engineer

- **Customer Empathy:** 15+ successful customer engagements, 80% retention, 4.5/5 satisfaction
- **Technical Depth:** Deep LLM expertise (LangChain, RAG, AI Agents) from production implementations
- **Full-Stack Capability:** Can build end-to-end solutions (React frontend, Python backend, cloud infrastructure)
- **Industry Versatility:** Experience across 8+ industries (legal, fintech, healthcare, retail, manufacturing, hospitality, insurance, banking)
- **Independent Execution:** Proven ability to own customer engagements end-to-end with minimal supervision
- **Communication Excellence:** 4+ years teaching experience, 100+ students trained, 100+ technical interviews conducted
- **Results-Oriented:** Focus on customer outcomes (ROI, time savings, revenue impact) with measurable results
- **Cross-Functional Collaboration:** Partnered with engineering, product, legal, business teams across organizations

Target Companies & Roles

Preferred: Anthropic, OpenAI, Databricks, Snowflake, Cohere, LangChain, Pinecone, Qdrant, Weaviate, Hugging Face

Role: Forward Deployed Engineer, Solutions Engineer, Customer Success Engineer (Technical), Field Engineer

Work Style: Remote-only, customer-facing, autonomous execution, cross-industry engagements
